389,000 lights
263,000 figurines
1,040 locomotives
263,000 figurines
280 moving cars
1,499 sqm model area
15,400 m track length
9 sections

This is what we’re particularly proud of: More than 16 million visitors have already dived into our world of dreams, illusions, and things beyond belief. Come and discover the largest model railway in the world and one of Germany’s greatest tourist attractions in Hamburg’s historic warehouse district. You can set out on a journey across more than 1,499 sqm from Scandinavia throughout Germany to Austria and Switzerland, all the way to far-away America.

A Miniature World of Superlatives

At Miniatur Wunderland imagination knows no boundaries. With a day and night simulation a day is only 15 minutes long. Beginning with dusk, more than 389,000 LEDs immerse the layout with an enchanting illumination. An impressive attraction is the smallest commercial airport in the world: Spread out over 125 sqm it shows the most complex flight simulation with more than 40 airplanes and respective ground staff. For more than 17 years we’re weaving ever more tales from our love for detail. At the 21st of February 2018 we opened our new section Venice. Following Italy we’ll build France / Monaco (beginning 2018) And after that? Prepare to be amazed!

We’re looking forward to your visit!

“One-of-a-kind worldwide.”
