

OUR SERVICES

FREE OF CHARGE FOR YOU!

A flat battery? Mobile phones and cameras of various brands can be charged in our **lockable charging stations** on the 4th floor and the Waiting Area.

Valuables, backpacks and bags can be safely stored in our **lockers** on the 2nd floor. To use a locker, you will need a 1 euro coin as a deposit. A change machine is available.

For all parents: baby-care rooms with free **diapers** and **wet wipes** can be found on the 2nd and 3rd floor and the Waiting Area. If you would like to heat up baby food, you are welcome to use the **microwave** in our bistro. Right behind the bistro there is also a **quiet space for breastfeeding**. Older children can let off some steam in our **cheese castle play area** just around the corner.

And just in case anything serious happens, there are **paramedics** on site at all times to handle any medical emergencies. On the 3rd floor there is also a **freely accessible defibrillator** with step by step instructions that all guests can use in case of an emergency.

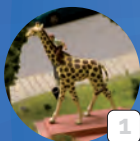

We would like to ask you not to take any food or drinks to the exhibition areas on the 3rd and 4th floor. If you would like to consume food or drinks you have brought, you are very welcome to do so in our **bistro area** on the 2nd floor.

The entire Wunderland is accessible, allowing visitors in wheelchairs to easily navigate the theme worlds. You can also **borrow a wheelchair** in the cloakroom. The different storeys of the Wunderland are accessible by **lift**. The location of the lift is indicated in the site plan. It goes without saying that we also have an **accessible toilet**. It is located on the 3rd floor.

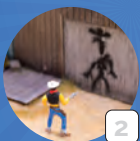

JOIN IN & WIN!

Look out for these 15 popular scenes, where you will find hints in the shape of **pink letters**. Note down the letters here and enter the solution at www.miwula.de/go/win. Take part now for a chance to win some exclusive prizes.

We are busy building new theme worlds to make sure we can continue to amaze you also in the future. Monaco and Provence are currently being created, and you can watch the construction progress right on site. Over the next few years, further parts of South America, such as Patagonia in 2022/2023 and the Atacama Desert, the Andes and the rainforest from 2022, will initially be created in the new space across the canal, before the model making team will eventually focus on Asia.
