OUR RESTAURANTS

In Miniatur Wunderland, there are two restaurants to choose from! In addition to the Bistro in the main building, there is also the Wunderland Diner in the building next door.

In our **bistro** we offer a wide selection of freshly prepared food and drinks at family-friendly prices.

After a walk over the glass bridge (next to the Provence) into the neighbouring building, you will find our **Wunderland-Diner** on the 2nd floor!

It offers delicious burger in a unique ambience. You can choose between burgers made from regional organic beef or a vegan alternative. Coffee and delicious cakes such as brownies and New York Cheesecake are also on the menu.

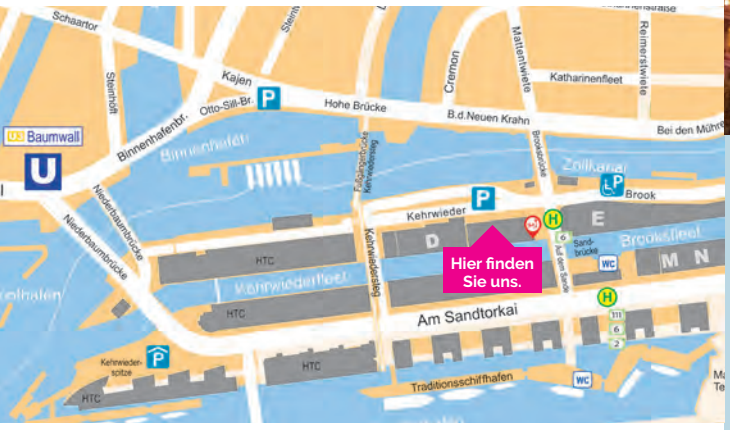

DIRECTIONS

U U-Bahn U3 Station **Baumwall** approx. 7 minute walk
U-Bahn U1 Station **Meßberg** approx. 10 minute walk

H MetroBus Line 6 approx. 1 minute walk
Stop **Auf dem Sande**

AN EXCEPTIONAL MINIATURE WORLD

We started building our lifetime project more than 23 years ago in December 2000. Our dream was to build the world's largest model railway exhibition. Since then, hundreds of thousands of details have been created in over a million working hours. Taking a closer look is definitely worthwhile, as some of the loveliest and most carefully crafted details can be easily missed at first glance. You will visit various theme worlds on your trip around the Wunderland, ranging from fantasy cities, via diverse landscapes, through to model making masterpieces. More than 23 million visitors have embarked on a discovery tour on a scale of 1:87 to date. Visitors worldwide have already voted Wunderland Germany's most popular tourist attraction five times!

"It is epic in both scale and creativity."
THE NEW YORK TIMES

ROME AND THE VATICAN IN ITALY

Let your imagination run free at Miniatur Wunderland: a day lasts just 15 minutes, thanks to the simulated rhythm of day and night. Once dusk sets in, the installation is bathed in the enchanting light of more than 500,000 LEDs. A very special attraction is the world's tiniest civil aviation airport: featuring more than 40 planes and the corresponding ground staff, the 125 square metres installation may well be the most elaborate flight simulation anywhere. In April 2024, the Principality of Monaco and its spectacular Formula 1 circuit was opened. Over 10 years were spent working on the of the race track. But that's not all: after Rio de Janeiro and Patagonia, the Atacama Desert, the Andes and the rainforest will become the next parts of South America and the Caribbean, as well as parts of Asia are to be created in the coming years. And Wunderland never runs out of ideas...

Let us surprise you!

"Hamburg's biggest tourist magnet."
